(c) Banks have been taking steps to improve their security arrangements so as to offer little inductment to miscreants to rob banks and also to deter them from such attempts. As this is a continuous process, security measures implemented by public sector banks are being reviewed from time to time and whenever further improvements are considered necessary, requisite guidelines/instructions are given to the banks. Depending on the risk factor involved, steps have been taken to appoint security guards, instal appropriate alarm systems, etc. in branches. Since apprehension of the culprits concerned is the most important deterrent, State Governments/Union Territory Administrations have also been requested to make all out efforts to arrest the culprits. Further, in order to motivate bank employees, the general public and the police to resist robbers/dacoits, a scheme of rewards has been announced. However, the impact of these steps, to a considerable extent, depedns on the general security environment in the locality in which the bank's branch/office is located.
